

Lexium MDrive[®] with eCylinder

NEMA 23 integrated 1.8° 2-phase stepper motor, control electronics, and captive shaft electric cylinder

Product overview

Lexium MDrive[®] (LMD) products with eCylinder integrate a 1.8° 2-phase stepper motor, drive electronics, and inline mounted captive shaft electric cylinder. Linear motion is produced by a coated, stainless steel acme screw / PEEK-blend nut system coupled directly to the motor's driving shaft. These compact products offer many distinct benefits including competitive price, high accuracy and repeatability. They may also provide a cleaner, quieter alternative to pneumatics.

Some LMD products include a fully programmable motion controller with on-board I/O, enabling stand-alone motion control without need of an external controller. Real time closed loop performance is available for enhanced performance and feedback.

hMT closed loop performance is available in products with either a multi-turn absolute encoder or incremental magnetic encoder. Closed loop performance maintains functional motor control to prevent loss of synchronization, offers variable current control, torque control, and use of the motor's full torque range without derating.

Multi-turn absolute encoders may benefit users by detecting and storing position information, even when powered down. This can eliminate homing routines and reduce setup time at system startup.

Application areas

Lexium MDrive[®] with eCylinder are ideal for machine builders who want a robust motor with integrated electronics and linear mechanicals. Reduced system cabling can minimize problems due to electrical noise, while closed loop products deliver enhanced performance. Fewer individual system components also eliminate multiple potential failure points.

Quiet, clean and compact, these LMD products integrate motor, drive electronics, and captive shaft electric cylinder to directly convert rotary motion to linear motion. Products deliver distinct benefits, including replacing pneumatics in some applications.

Specifications

Input power	Voltage		+12 ...+60 VDC
	Current maximum (1)		3.5 A
Motor	Frame size	NEMA	23
		inches	2.3
		mm	57
Maximum thrust (2)	PEEK-blend nut	stack size	single
		lbs	250
Stroke length	Minimum	kg	113
		inch	2.0
	Maximum	mm	5.0
		mm	24.0
Repeatability	Maximum	inch	610
		mm	0.005
Weight (without screw)			0.127
		oz/g	24.8 / 703
Step angle α			1.8
Thermal	Operating temp non-condensing	Heat sink maximum	85°C
		Motor maximum	100°C
Protection	Type	Temp warning	0 ... 84°C, user selectable
		Earth grounding	via product chassis ground lug
		IP rating	IP20
Communication versions	Pulse/Direction	RS-422/485 serial interface, 4 operating modes	
	Programmable Motion Control	RS-422/485 programmable with stored memory	
	CANopen	CANopen with programmable controller	
	Ethernet	EtherNet/IP, Profinet, ModbusTCP	

(1) Actual power supply current will depend on voltage and load.

(2) Performance data for maximum force/load is based on a static load and will vary with a dynamic load.

An optional Communication Converter is recommended with first orders.

Screw lead A = 0.100" / 2.54 mm B = 0.250" / 6.35 mm C = 0.500" / 12.7 mm D = 1.000" / 25.4 mm	L M D C M 5 7 1 P - C S A 0 6 0 M N N
Stroke length available in 0.1" increments 020 = 02.0" / 51 mm minimum 240 = 24.0" / 610 mm maximum	L M D C M 5 7 1 P - C S A 0 6 0 M N N
Mounts M = flange mounts F = foot mounts	L M D C M 5 7 1 P - C S A 0 6 0 M N N

(1) Closed loop control delivers encoder feedback and hMT enhanced motor performance.

(2) Pulse/Direction products are not available with Absolute Encoder.

Options

Customization

Options are available for customizing LMD eCylinder products to your specific application needs. These include:

- positioning sensors
- mounting hardware
- cylinder ends
- ball screw configuration
- screw sizes

FlexCenter
